

Quick Start Guide

Install K9 from the Internet

Use this Quick Start Guide to install and configure the Blue Coat® K9 Web Protection from the Internet.

Before you begin, please make sure your system meets the requirements listed in the Blue Coat K9 Web Protection User Manual.

Downloading and Installing Blue Coat K9 Web Protection

- 1. Point your web browser to www.k9webprotection.com
- 2. In the horizontal navigation bar, click Get K9 Now.
- 3. Fill out the simple form to complete the license request and click **Request License**.
- 4. Your K9 Web Protection license will be e-mailed to you shortly. You need this key to install the K9 software.

Note: Your e-mail account (and/or your Internet Service Provider) might be set to disregard unwanted e-mail (known as "spam"). To get your K9 license e-mail, configure your mail account to accept messages from k9noreply@bluecoat.com. If you do not see the K9 license e-mail shortly after requesting your license, check your email account anti-spam settings, and check your "junk" or "anti-spam" folders to see if the K9 license e-mail was routed there.

5. Navigate to the Download Software page to begin downloading the software for Windows or Mac. You can also use the download link in the e-mail containing your license key.

Windows Installation

1. When prompted, save the file named k9webprotection.exe on your computer.

After the file download is complete, open the folder where you saved the file. Double-click on k9webprotection.exe to continue the installation process.

- 2. The Setup Wizard starts.
- 3. You will be prompted to accept the K9 Web Protection license agreement. You must click **I Agree** to continue the installation.
- 4. At the Release Notes page, you have the option to read or print the K9 Release Notes.
- 5. Choose an installation location. K9 Web Protection defaults to C:\Program Files\Blue Coat K9 Web Protection. To install the software in a folder other than the default, click Browse to a folder or manually enter a path name in the Destination Folder field.
- 6. At the Install License page, copy your K9 Web Protection license from the e-mail, paste it into the **License** field, and click **Next**.

 At the Install Password page, enter a K9 administrator password in the provided fields, and click Next. Note: The password must be 15 characters or less and can only include alpha-numeric characters (for example, A-Z and 0-9) as well as !, @, #, \$, %, ^, *, (,), {, and }.

- 8. After you enter and verify your password, you will be asked to place application shortcuts. Choose which shortcuts you want by checking the appropriate boxes, then click **Install**.
- 9. You must restart your computer to begin protecting your system.
- 10. Continue with "Configuring K9 Web Protection".

Mac Installation

- Follow the prompts on your screen to download the software. Depending on your Web browser, you might be prompted to save a file named k9webprotection.dmg file or you might be required to continue the download because it contains an application.
 - If your Web browser saved K9 Web Protection in a downloads folder, open the downloads folder and double-click k9-webprotection.dmg and wait for the disk image to mount.
 - If an icon named K9 Web Protection displays on your desktop, double-click the icon.
- When it displays, double-click k9webprotection.pkg.
- 3. At the K9 Web Protection Release Notes page, you have the option to read or print the K9 Release Notes.
- 4. You will be prompted to accept the K9 Web Protection license agreement. You must click **I Agree** to continue the installation.
- 5. At the User License & Password page, copy your K9 Web Protection license from the e-mail, paste it into the **License** field, enter a K9 administrator password in the provided fields, then click **Continue**.

Note: The password must be 15 characters or less and can only include alpha-numeric characters (for example, A-Z and 0-9) as well as $!, @, #, $, %, ^, *, (,), {, and }$.

- 6. On the Select a Destination page, click the destination drive on which to install the K9 Web Protection software, and click **Continue**.
- 7. Click **Install** to begin the installation.

Configuring K9 Web Protection

- 1. After completing the installation, start K9 Web Protection as follows:
 - Mac: Go to /Applications/K9 Web Protection/ and double-click Configure K9 Web Protection.
 - Windows: Double-click the K9 Web Protection icon on your desktop or, on Windows, click Start
 → [All] Programs → Blue Coat K9 Web Protection
 → Blue Coat K9 Web Protection Admin.
- 2. At the top of the page, click Setup.
- 3. You are required to enter your K9 Web Protection administrator password and click **OK** or press the Enter (Windows) or Return (Mac) key to continue.

🔥 НОМЕ	4 VIEW INTERNET ACTIVITY	🔀 SETUP 🤇	GET HELP			
×	Web Categories	to Block				
SETUP	Set the categories you want to b	lock or allow. More Help				
A	High Protects against all default-level categories, plus chat, newsgroup and unrated sites.					
Time Restrictions	Protects against all adult content, security threats, illegal activity, sexually-related sites and online community sites.					
Web Site Exceptions	The following categories are cu	urrently blocked. (Click catego	ry name for description.)			
Blocking Effects	Abortion	Illegal Drugs	Pornography			
URL Keywords	Adult / Mature Content	Intimate Apparel / Swimsuit	Proxy Avoidance			
Advanced	Alternative Sexuality / Lifestyles	LGBT	Sex Education			
Password/Email	Alternative Spirituality / Occult	Nudity	Social Networking			
K9 Update	Extreme	Open Image / Media Search	Spyware / Malware Sources			
	Gambling	Peer-to-Peer (P2P)	Spyware Effects			
	Hacking	Personals / Dating	Suspicious			
	lilegal / Questionable	Phishing	Violence / Hate / Racism			
	Moderate Protects against all adult content, security threats and illegal activity.					
	Minimal Protects against pomography and security threats.					
	Monitor Allows all categories - only logs traffic.					
	CUSIOM Select your own set of	categories to block.				

Initially, the protection level is set to **Default**, which blocks the most common offensive and harmful Web sites.

- Optionally select a different level of threat protection from High (for maximum protection) to Monitor (which logs Web activity but does not block any sites), or choose Custom to define your own categories to block.
- 5. For more information about a particular category, click its name.
- 6. When you are finished, click **Save** at the bottom of the page.

For additional information about configuring K9 Web Protection, refer to the *K9 Web Protection User Manual*, which is available from the K9 Web site.
